01 Positioning dan pembuka

Asumsi latihan: wawancara dalam English. Penjelasan Indonesia. Mandarin sepenuhnya opsional di halaman 10.

Pesan yang harus diingat interviewer

An Indonesian business operator and project leader who uses technology and data to connect stakeholder needs with execution.

Tampilkan diri sebagai orang yang memahami kebutuhan bisnis Indonesia, mampu mengoordinasikan tim, dan mengeksekusi proyek dengan teknologi serta data.

Tell me about yourself.

I'm Richie from Indonesia, currently studying in the English-taught Global MBA at Zhejiang University. My background combines business coordination with technology and data. At Karunia, I assisted the director with purchasing and client coordination, and led a 15-person team that delivered 12 internal systems. The ERP later reached around 1,000 daily users. I want to bring that experience to an overseas business team supporting Indonesia, while learning fintech through rotations and concrete responsibilities.

Urutan: Indonesia + GMBA > koordinasi bisnis > bukti tim > kontribusi MT. Jangan membuka dengan daftar bahasa pemrograman.

Lima kekuatan, urut sesuai relevansi MT

1. Stakeholder & bisnis Indonesia: Komunikasi mitra, persiapan negosiasi, proposal kerja sama, dan tindak lanjut kanal Indonesia.

2. Project management & koordinasi: Menyelaraskan prioritas, menjaga owner dan deadline, serta membawa proyek kecil sampai bisa digunakan.

3. Jembatan China-Indonesia: Menjelaskan kebutuhan lokal kepada HQ dan mengubah keputusan HQ menjadi langkah yang jelas untuk tim Indonesia.

4. Business & data thinking: Riset pasar, laporan, kualitas data, funnel, operasi dan koordinasi risiko.

5. Founder & kebutuhan pelanggan: Mengenali kebutuhan pelanggan, menguji solusi, memikirkan penerimaan pasar, dan mengambil tanggung jawab hasil.

Cara latihan setiap jawaban

Pahami maksudnya > jawab tanpa skrip > bandingkan dengan contoh > cek fakta dan kontribusi pribadi > ulang hanya dengan petunjuk. Contoh English adalah pembuka; cerita nyata tetap harus kamu isi.

Tiga bukti yang ingin saya tonjolkan

02 Stakeholder Indonesia dan BD

Prioritas pertama dari saran temanmu: hubungan bisnis, negosiasi, dan tindak lanjut. Pengalaman industri adalah dasar transferable.

How does your Indonesian business experience prepare you for this role?

At Karunia, I assisted the director with purchasing, client meetings and partner coordination involving companies such as Bayan, Kideco and SANY. My contribution was to understand business needs, prepare information and follow up on the next actions. That experience is relevant to partner communication and cooperation proposals in Indonesia. I would apply the same discipline in fintech while learning the product, partner requirements and local processes. I would not treat industrial relationships as an existing fintech sales network.

Saran temanmu tentang relasi industri relevan. Perjelas siapa mitranya, tindakanmu, dan keputusan direktur; tambahkan satu kejadian asli sebelum wawancara.

What did running a parts-supply business teach you?

CV Kid Gemilang handled more than 1,000 vehicle parts per month and worked with eight suppliers. I was responsible for sourcing, quotations, purchasing, checking deliveries against customer purchase orders and inventory valuation. It taught me to connect a customer's requirement with supplier execution, accurate records and delivery commitments. For a partner-facing role, I would bring the same discipline to preparation, follow-up and checking whether commitments have actually been met.

Beri contoh satu order asli. Jumlah komponen berbeda dari jumlah pengguna sistem.

Isi satu cerita pertemuan atau pengadaan

Stakeholder, kebutuhan, dan informasi yang saya siapkan

Tindakan saya; keputusan akhir direktur / owner

Hasil dan tindak lanjut yang bisa saya buktikan

Bayan, Kideco, SANY adalah mitra bisnis. Hindari klaim sales quota, nilai kontrak, atau jaringan fintech yang belum ada.

03 Proyek lintas tim: ERP

Bukti project management paling kuat: tim, prioritas, proses bisnis, penerapan dan hasil. Stack hanya jika ditanya.

Tell me about a project you led across different departments.

A representative project is Karunia's internal ERP, covering logistics, purchasing and billing. I contributed to core development and coordinated business requirements and team delivery. Our 15-person team delivered 12 internal systems, and the ERP later reached around 1,000 daily users. The business value was getting departments to work with consistent processes and data. I can walk you through one specific module to show my own decision and its outcome.

Angka skala adalah hasil tim. Isi satu modul, satu keputusan dan bukti hasil. Kalimat terakhir adalah pengantar; jangan berhenti tanpa menjelaskan modul asli.

How did you manage the team and competing priorities?

We used sprints and Slack to track work at Karunia. I translated business needs into development tasks and coordinated priorities and progress. My focus was to make the objective, owner and delivery standard clear. When priorities competed, I would compare business impact, deadlines and dependencies, then confirm the trade-off with the responsible decision-maker. I can illustrate this with a sprint decision I actually handled.

Jelaskan proses mengelola tim, bukan sekadar ukuran tim. Isi contoh satu Sprint dan pihak yang menyepakati prioritas.

Cerita satu modul: jangan berhenti pada angka skala

Modul + pengguna + masalah sebelum

Keputusan pribadi + trade-off + cara koordinasi

Hasil + metrik + periode + sumber bukti

04 Jembatan HQ dan Indonesia

Hubungkan komunikasi dengan keputusan dan eksekusi. Bukan hanya kemampuan menerjemahkan.

How would you bridge the Shanghai team and Indonesian stakeholders?

I would first make sure both sides agree on the business objective and definitions. I would explain local needs with concrete examples, clarify misunderstandings, and document decisions, owners and deadlines. My Indonesian experience and English-taught GMBA in China help me understand both contexts. I would use English for complex business discussions and written confirmation where needed, while continuing to improve my Mandarin. The goal is that both teams can act on the same understanding.

Jangan mengklaim Mandarin bisnis lancar atau tahu semua budaya kerja China. Bukti terbaik: satu perbedaan pemahaman yang kamu luruskan dengan contoh dan action list.

Why are you interested in Jiayin's overseas business role?

The role interests me because it connects Indonesian market understanding with product, operations and cross-border execution. I have worked on business coordination and system delivery in Indonesia and am now studying in China. I want to apply that combination to understanding local users, coordinating with headquarters and improving business processes. I would first learn the team's product and priorities, then contribute through reporting, partner follow-up or a focused operational project.

Jawab berdasarkan tugas yang dijelaskan, bukan menghafal angka perusahaan. Training, entitas, mentor dan scope aktual tetap dikonfirmasi.

Bahasa kerja: jawaban pendek yang jujur

Indonesian is my native language, and I can work fluently in English. My Mandarin is around HSK 3-4 for everyday communication. For complex business discussions, I prefer English or written confirmation so the meaning is accurate.

Tinggal dan studi di China memberi exposure lintas budaya; tidak otomatis berarti berpengalaman kerja korporat China. Konfirmasi tujuan, definisi, owner dan deadline pada setiap tim.

Contoh perbedaan pemahaman yang pernah saya luruskan

05 Data yang menghasilkan keputusan

Proyek Bayan, ERP dan business AI agent membuktikan dasar analitis. Jelaskan pertanyaan bisnis dan cara memeriksa hasil.

Give an example of using data to improve business operations.

In projects with the Bayan team, we consolidated more than 10,000 records covering logistics, attendance, item status, payroll and overtime. My contribution was to align the data structure with business processes and reduce manual handling. The relevant skill is turning fragmented operational information into something teams can use consistently. I can explain one real data-quality issue, how I checked it and which result we could substantiate.

Bayan adalah mitra, bukan pemberi kerja. Isi satu data exception dan validasi asli; jangan mengarang persentase penghematan.

How was your business AI agent different from the ERP project?

The ERP and the business AI agent were related but had different scopes. The agent project involved a ten-person team over about eight months and was used by around 100 staff for natural-language queries, document retrieval and business documents. I contributed to requirements, architecture and core code. The business purpose was to make finance, purchasing and logistics information easier to access. Those figures are separate from the 15-person team and the ERP's roughly 1,000 daily users.

Dahulukan masalah akses informasi dan keputusan bisnis. Jelaskan Text-to-SQL atau stack hanya jika diminta.

75% dan 95,1%: siap menjelaskan apa yang diukur

75%: sebut nama metrik dan unit, baseline, kondisi sesudah, sampel, periode dan sumber bukti. Klaim “faster” tidak otomatis sama dengan waktu turun 75%. Jika bukti persis belum tersedia, pakai hasil yang bisa dipastikan. Copilot 95,1%: development-set, bukan blind test atau akurasi produksi.

Satu data exception asli + aturan validasi / rekonsiliasi saya

Bukti hasil atau rincian pengukuran yang perlu saya siapkan

06 Founder, MT dan peran bisnis

Tekankan ownership, customer thinking, kesiapan rotasi dan komitmen bekerja dalam struktur tim.

What has building your own product taught you about business?

With Integra ERP, I am developing a product for Indonesian SMEs and taking responsibility for the application and architecture. It has made me think about customer workflows, usable solutions and how a product could fit the local market. It is still pre-launch, so I distinguish what I have built from market adoption that has not yet been proven. The transferable strength is ownership from the business problem through execution, while being clear about the evidence behind each claim.

Ini bukti ownership dan customer thinking, bukan bukti traction. Tambahkan satu keputusan produk yang benar-benar kamu ambil.

Why join a management trainee programme after leading a team and founding products?

I already have project and team experience, but overseas fintech is a new domain for me. I want to understand the product, operations, risk and partner processes before taking broader responsibility. Rotations would let me build that foundation while contributing through coordination, data and execution. I am comfortable starting with concrete work and learning from feedback. I care about the growth path and actual responsibility, rather than the title alone.

Tunjukkan kesiapan rotasi dan tugas awal. Jalur MT adalah kesempatan mengambil tanggung jawab secara bertahap, bukan janji langsung jadi manager.

Why move from a technical background into a business role?

Technology is my tool, but the business problem is what interests me most. At Karunia, I worked with users, suppliers, clients and the director as well as developing systems. I enjoy the full process from defining the problem to implementing a solution. This role would let me use technology and data while taking broader responsibility for business execution.

Tunjukkan pilihan yang sadar dan satu contoh koordinasi; hindari berfokus pada stack.

Satu keputusan produk asli: kebutuhan pengguna, pilihan, dan bukti

07 Fintech dan rencana awal

Tunjukkan judgement bisnis yang realistis. Contoh kasus bersifat hipotetis, bukan pengalaman kerja di perkreditan.

Pahami alur bisnis sebelum memberi solusi

Based on the preparation brief, Jiayin connects borrowers with financial institutions and supports the business through technology, operations and risk-related services.

Alur yang perlu kamu jelaskan: kebutuhan pengguna > akuisisi dan onboarding > verifikasi informasi > pengajuan dan risk approval > pencairan > repayment dan layanan lanjutan. Setiap langkah punya data, owner dan kontrol yang berbeda.

You do not have lending experience. Why should we hire you?

I would not describe ERP experience as lending experience. My transferable foundation is business processes, data quality and team delivery. I would learn the product, risk definitions and local requirements, then start with reporting, exception handling or process improvement under the appropriate owners. That lets me contribute while learning the domain. I would work with risk and compliance specialists rather than claim authority over credit decisions.

Pengalaman teknis adalah alat. Tunjukkan belajar cepat lewat tugas konkret; jangan mengaku underwriting atau memutuskan kelayakan kredit.

How would you improve one Indonesian process in your first 30 days?

In week one, I would confirm the objective, workflow, data and owners. In week two, I would choose one high-impact, controllable problem and establish a baseline. In week three, I would run a small pilot with human review. In week four, I would compare results, document issues and prepare handover recommendations. The responsible owner would confirm the target and rollout scope; I would not promise an untested improvement percentage.

Beri hasil tiap minggu. Target harus disepakati dan pilot dapat dihentikan.

Kasus partner: dari peluang ke pilot

Tentukan tujuan kerja sama; verifikasi entitas, asal customer, izin data, dan biaya. Bandingkan kualitas customer dan keluhan, bukan volume atau CAC saja. Buat pilot dengan metrik, owner, batas risiko dan stop condition. Pengadaan industri adalah skill transferable; kanal kredit adalah domain baru.

Kasus funnel: hitung sebelum menyimpulkan

10.000 visits > 6.000 registrations > 2.400 applications > 1.800 approvals > 1.440 disbursements. Konversi tahap: 60% / 40% / 75% / 80%; total 14,4%. Samakan cohort, periode dan denominator. Data satu periode belum membuktikan penurunan. Bandingkan baseline/segmen; periksa form, verification, error dan fee clarity sebelum uji kecil.

Untuk kasus operasi/AI: tangani dampak pengguna sesuai wewenang, verifikasi transaksi dan sumber data, koordinasikan owner, lalu uji perbaikan. Nominal pembayaran harus dari sistem terotorisasi, bukan tebakan model.

Pilihan masalah pertama + baseline + ukuran hasil

08 CV lanjutan, mulai kerja, penutup

CV yang dikirim menjadi acuan. Ada versi lama dengan perbedaan tanggal; pastikan jawaban dan dokumen konsisten.

Kambyan: dasar data, bukan cerita drone panjang

At Kambyan, I worked on database structure and operational data for a drone-automation project. It gave me a foundation in data quality that I later applied to enterprise workflows.

Taylor’s dan ZJU: hubungkan pendidikan ke bisnis

My Computer Science background gives me an analytical foundation. The English-taught GMBA helps me connect it with strategy, finance, operations and international business. My latest-term weighted average is 89.21 out of 100, not a cumulative GPA.

WeUseAI dan side projects: scope dan komitmen

I distinguish hosted products that are pre-launch from specific client work in my resume. If I join full-time, the job is my priority, and I will follow rules on outside work, conflicts of interest and intellectual property.

When can you start full-time, and are you open to Shanghai training followed by Indonesia?

My earliest full-time start date is 1 May 2027, and I expect to receive my MBA degree certificate in June 2027. I am open to a Shanghai training period followed by an Indonesia assignment. I would like to confirm the programme timeline, responsibilities, employment entity and the work-permit process if training involves working in China. My availability date should be considered separately from the completion of onboarding and work authorisation.

Jangan menjanjikan full-time sekarang. Kecocokan kohort, durasi training, kontrak dan izin belum diasumsikan selesai.

Tiga pertanyaan balik

What is the most important Indonesian business problem this trainee should help solve, and how will success be assessed in the first 90 days?

How are the product, risk, operations and business-development rotations organised, and who will mentor me?

Which entity and team would employ me, and how would the Shanghai training and Indonesia assignment fit my May 2027 availability?

Penutup

This role fits the combination of my Indonesian business experience, project coordination and data skills. I am interested in joining, learning the fintech domain and demonstrating results through rotations and concrete work.

Cek sebelum masuk: tanggal akhir Taylor’s/Kambyan dan angka Taylor’s pada CV yang benar-benar dikirim; scope pekerjaan klien TRO Creative / Hansaplast; klaim 75%; timeline full-time 1 Mei 2027 versus gelar Juni.

09 Simulasi English tanpa skrip

Tutup halaman 1-8. Rekam jawaban lisan; sesudahnya cek isi dan fakta. Contoh yang dibuka membuat percobaan itu berbantuan.

Nilai sendiri: 0 = belum bisa; 1 = perlu contoh / isi belum lengkap; 2 = mandiri, jelas, dan faktanya dapat dijelaskan. Ini bukan pemeriksaan bahasa atau fakta otomatis.

01. Tell me about yourself. Nilai: __ / 2

02. How does your Indonesian business experience prepare you for this role? Nilai: __ / 2

03. Tell me about a project you led across different departments. Nilai: __ / 2

04. How would you bridge the Shanghai team and Indonesian stakeholders? Nilai: __ / 2

05. Give an example of using data to improve business operations. Nilai: __ / 2

06. What has building your own product taught you about business? Nilai: __ / 2

07. Why join a management trainee programme after leading a team and founding products? Nilai: __ / 2

08. Why are you interested in Jiayin's overseas business role? Nilai: __ / 2

09. You do not have lending experience. Why should we hire you? Nilai: __ / 2

10. Tell me about a mistake or failure and what you changed afterward. Nilai: __ / 2

11. When can you start full-time, and are you open to Shanghai training followed by Indonesia? Nilai: __ / 2

12. Can you work with Chinese and Indonesian teams? Nilai: __ / 2

Dua cerita wajib asli: kegagalan dan konflik

Kegagalan: situasi, keputusan saya, dampak, pemulihan, perubahan

Konflik: dua tujuan, bukti, komunikasi, keputusan owner, hasil

Rencana malam ini: 75 menit

15 menit: intro, alasan MT/Jiayin, dan lima kekuatan.

25 menit: isi cerita stakeholder, modul ERP dan data; siapkan satu kegagalan asli.

20 menit: simulasi English satu pertanyaan setiap kali; cek isi, lalu ulang jawaban lemah.

10 menit: satu kasus partner dan satu kasus data/operasi.

5 menit: CV yang dikirim, Tencent, kamera/mikrofon, koneksi dan waktu undangan.

Besok: 13:30 cek perangkat, 13:50 siap masuk, 14:00 wawancara Tencent; sediakan waktu hingga 16:30 menurut sumber. Ikuti zona waktu undangan; UTC+8 masih asumsi.

10 Mandarin opsional

Lewati halaman ini untuk fokus pada English. Gunakan frasa hanya untuk memahami pertanyaan, meminta klarifikasi, atau menjelaskan lebih akurat.

Belum paham pertanyaan

不好意思，能请您换一种说法吗？

Bù hǎoyìsi, néng qǐng nín huàn yì zhǒng shuōfǎ ma?

Maaf, boleh dijelaskan dengan cara lain?

Memastikan maksud

我确认一下，您的意思是……，对吗？

Wǒ quèrèn yíxià, nín de yìsi shì..., duì ma?

Saya konfirmasi: maksud Anda adalah …, benar?

Minta menjelaskan dalam English

这个部分我想用英语解释得更准确，可以吗？

Zhège bùfen wǒ xiǎng yòng Yīngyǔ jiěshì de gèng zhǔnquè, kěyǐ ma?

Boleh saya menjelaskan bagian ini dalam bahasa Inggris agar lebih akurat?

Kenali pertanyaan yang mungkin terdengar

为什么想加入嘉银？

wèi shén me xiǎng jiā rù jiā yín？

Mengapa ingin bergabung dengan Jiayin?

介绍一个最有代表性的项目。

jiè shào yí gè zuì yǒu dài biǎo xìng de xiàng mù。

Ceritakan proyek yang paling mewakili kemampuanmu.

什么时候可以全职入职？

shén me shí hòu kě yǐ quán zhí rù zhí？

Kapan kamu bisa mulai bekerja penuh waktu?

Angka jika ingin menyebut bukti dalam Mandarin

15 orang: 十五人 / shíwǔ rén. 12 sistem: 十二个系统 / shí'èr gè xìtǒng. 1.000 pengguna: 一千名用户 / yìqiān míng yònghù.

Materi ini mengubah fokus dari hafalan Mandarin menjadi isi wawancara English. Contoh English disusun ulang berdasarkan materi wawancara revisi 11 Oktober 2026, CV International Business / Digital Transformation, serta arahanmu 14 Oktober. Rotasi aktual, mentor, entitas, training dan jalur jabatan harus dikonfirmasi.

CV lama mencantumkan akhir Taylor's Maret dan Kambyan Januari 2023; materi wawancara terbaru mencatat Juli 2023. Angka Taylor's juga berbeda antarversi. Cocokkan dokumen yang dikirim dan bukti pribadi. Tidak ada tanggal atau capaian baru yang diasumsikan untuk menyelesaikan perbedaan ini.
